Description– Junior Application Developer

Division: Information Technology
Reporting to: Manager, Application Development
Career Level: Entry level
Pay Type: Salary

Job Overview

The Junior Application Developer will be responsible for supporting the translation of software requirements into workable programming code and maintain and develop programs that support the business.

Role

- Support and participate in the development and testing of technical updates to the Temenos banking system
- Support and participate in the development of BRD/FSD and RFP as required for existing and new clients
- Eagerly support code development and/or modifications to routines, versions, enquires, screens, tabs, menus, process workflows, local fields, and local tables
- Support and develop web services and web apps that are efficient and user-friendly
- Be involved with the interface development, modifications and updates
- Support and Participate in the automation of services, workflow development and configuration management
- Share knowledge of new software or system changes that may affect the work that we do
- Proactively maintain user manuals and training materials
- Collaborate with your peers and stakeholders to add to the collective innovative thinking that can drive new business ideas for FirstOntario
- Build and utilize working relationships with internal business partners across the organization and external contracts
- Consider health & safety as a primary concern to ensure the safety of self and others
- Perform other duties as required

Required Skills

- Completed or be enrolled in a post-secondary program in computer science or equivalent field
- Be familiar in IT software, languages and frameworks such as C#, .Net, MVC, XML, Web Services, Eclipse, Java
- Be comfortable analyzing and writing SQL queries
- Demonstrate your knowledge of System Develop Life Cycle (SDLC) processes which include planning, creating, testing and deploying an information system
- Be an expert user of MS Office
- Have knowledge of application development best practices
- Enjoy a challenge when it comes to technical issues and be resourceful in the way you find a solution
- Be quick to respond to requests for service from all of your clients in a manner which is clearly understood
- Embrace a continuous learning philosophy and enjoy staying abreast of industry standards and best practices
- Be analytical and detail oriented when dealing with technical support issues and IT projects
- Demonstrate superior communication and interpersonal skills
- Be aware of and mitigate enterprise risk factors and ensure compliance with applicable regulations, legislation and FirstOntario policies and procedures

Accommodations for persons with disabilities are available upon request during the application process.
